

# Rackmount Kit for ServSwitch™ Brand CAT5 KVM Extenders

You can use this two-bracket Rackmount Kit to mount most Local or Remote Units of ServSwitch™ brand CAT5 KVM Extenders in a 19" rack. (Supported Extender models include our product codes ACU1001A, ACU1002A, ACU1009A, ACUREM, and the remote units for ACU1008A; Extender models *not* supported include the ACU1006A and ACU1012A Hubs and the ACU1008A Local Units.) To use a Kit to mount an Extender Unit, take these steps, referring to the illustration below:

1. Unscrew and keep the two screws on each side of the Unit's case.
2. Match up the two holes in the "Unit end" of each Kit bracket with the two now-vacant screwholes on each side of the Extender Unit, then fasten the brackets to the Unit with the screws you removed in step 1.
3. Once you've attached both brackets, match the holes in the "rack end" of each bracket to an appropriate set of matching holes on your equipment rack, then screw the Extender-Unit assembly to the rack using your own screws, bolts, or cage nuts (not included).
